

The Fresher Blueprint

Three phases, one cycle · Aspiring IT Professionals

THE CYCLE — REPEAT UNTIL THE DOOR OPENS

1 PHASE 1 — BUILD CAPABILITY

- Map your IQ honestly — strengths, gaps
- Map your network — who can open which door
- Domain × technology → your problem statement
- Technical skills + soft skills — both halves
- Build a project — the project is the proof
- Use GenAI to accelerate the build

2 PHASE 2 — APPLY

- Resume built around the project — proof, not claims
- Job platforms + your network's network
- Become your own Sales & Marketing

3 PHASE 3 — ITERATE · THE LOOP WITHIN THE LOOP

- If it doesn't work — return to Build Capability
- Refine the IQ · expand the network · new intersection · next project

The iteration is the only variable within your control. A project is never built once.

Print this. It's the instrument we fill in together in the workshop —
you'll leave with yours complete: your direction, your path, one you can revisit at every pivot.
